

## **RAW MATERIALS & S B R**

### **Mowilith AM 50 (Naphthelene 50%)**

#### **Characteristics:**

Mowilith AM 50 is Naphthalene sulphonate formaldehyde condensate which is widely used as major ingredient in various types of Stabilizer and admixtures for concrete and mortar industries.

#### **Advantages:**

Excellent mixing Agent Improve performance, durability and pumping .Reduction in water content to improve strength Cracks and Shrinkage is reduced Reinforcement is improved

Very good compatibility  
with cement

#### **Uses:**

General and Industrial Application

High performance

and strength

Concrete.Pre-

Casting

Appearance	Dark Brown Liquid
Solid Content	50 ± 1 %
Chloride Content	< 0.05 %
pH	7.0 – 9.0
Solubility	Soluble in water
